**Professional Diploma in  
Education for grades  
(5-10)**

### Program Overview:

It is a specialized vocational diploma that aims to improve competencies and skills of 10-5 grade teachers. The one year program is based on the experiential learning approach, where participants undergo several stages during the application of the program: face-to-face meetings once a month, A full day work dedicated to a training module linked to teacher competencies, and then evaluation assignment to be applied in the field. Moreover, teachers are engaged in two learning circles of 3 hours each; to discuss tasks and reflect on the activities related with the tasks carried out and the experiences gained during the learning circles. The participants are linked with one another, and with the facilitator and program manager through Moodle environment, including supporting activities and tasks related to face-to-face meetings, the program is concluded with the graduation project which is a main graduation criteria to get a professional diploma certificate in Education accredited by the Academic Quality assurance committee (AQAC).

### Main Objectives:

- Upgrading the competencies of the underqualified and teachers who have pure academic disciplines.
- Developing teachers' skills, and promoting their educational and academic experience. Institutionalizing the continuous professional
